Objective

As a final-year Information Technology student, I have developed a strong foundation in programming and software development, with hands-on experience in Python, C++, Java, and C#. I am also continuously developing my skills in RESTful API development using ASP.NET Core. These programming languages have strengthened my problem-solving abilities and deepened my understanding of software engineering principles skills that are highly relevant to a software development role.

Education

BSc Information Technology

North West University 2024 – 2026

Majors: Computer Science and Information System

Relevant Coursework:

Object Orientated Programming, System Analysis and Design ,Discrete Mathematics, Data Structures and Algorithms Data Analysis, Linear Programming ,Artificial Intelligence

Technical Skills

- Programming Languages: C#, C++, Java, Python, SQL, ASPX
- Frameworks & Libraries: ASP.NET Core, Entity Framework Core
- Databases: SQL Server (design, queries, and management)
- Tools & Platforms: Visual Studio 2026, Git, Swagger, Postman
- Core Concepts: RESTful API development, database migrations

Soft Skills

- Problem-solving and analytical thinking
- Strong attention to detail
- Teamwork and collaboration
- Effective communication (written and verbal)
- Time management and ability to meet deadlines
- Adaptability and willingness to learn new technologies
- Critical thinking and logical reasoning

Projects

PhoneBook API (ASP.NET Core Web API)

Individual project developed to demonstrate backend development skills using ASP.NET Core Web API, focusing on building a simple and efficient contact management system.

- Designed and implemented CRUD functionality for managing contacts
- Developed RESTful API endpoints using controllers, routing, and HTTP methods
- Structured contact data to include names, phone numbers, and email addresses.
- Tested API functionality using Postman to ensure correct request and response handling.
- Applied core backend development principles to build a scalable and maintainable API.

<https://github.com/adivhahoM5/PhoneBookAPI>

Municipal Complaint Management System

Group project for *System Analysis and Design (CMPG 223)* module — achieved **94%**.
Developed to help municipalities manage Community Members, Services, and Complaints efficiently.

- Designed and implemented CRUD functionality for Community Members, Services, and Complaints.
- Built a role-based login system for Administrators and Community Members.
- Developed service request tracking for water, electricity, and waste management.
- Created reporting features to generate summary reports for services and complaints.
- Collaborated using Git for version control and project management.

LEADERSHIP & INVOLVEMENT

Student Assistant

North West University

CMPG 211 –Object Oriented Programming (Java)

March 2026 – June 2026

Facilitating communication between students and the lecturer.

Monitoring discussion forums and LMS chat to assist with queries.

Supporting students in understanding module content through peer discussion, clarification, and additional examples.

Helping students develop digital literacy and navigate the LMS effectively.

Conduct Programming Tutorials.
